

```

1  $L \leftarrow$  the list of points of  $P \setminus \{p\}$  sorted in ascending order of their distances to  $p$ 
2 while  $L$  not empty do
3    $u \leftarrow$  the next point in  $L$ 
4   create an edge from  $p$  to  $u$ 
5   remove from  $L$  every point  $v$  satisfying  $D(u, v) < \frac{1}{\alpha} \cdot D(p, v)$  (note:  $u$  itself is also removed)
6 end

```
